NRP LP
Network Connectivity Technical Details
Rev 2.0

Revision History

Revision Number	Effective Date	Notes
1.0	07/30/2021	Initial version
2.0	09/01/2021	Revised the Allow List for different types of access, either Retail Portal or Organization Subdomain.

Purpose

The purpose of this document is to describe the network connectivity requirements for the NRP Learning Platform.

NRP Curricula

The NRP curricula is broken into two portions: Cognitive and Skills.

Cognitive

The Cognitive portion consists of browser based, self-paced learning via an internet connected device.

Skills

The learner attends an Instructor Led Event (ILE).

Type of Access

Retail Portal

Access to the NRP LP via the Retail Portal allows an individual to utilize the e-commerce module to purchase NRP courses directly in the NRP LP.

Organization Subdomain

Organizations that proceed with an implementation, such as Enterprise or 3rd Party LMS implementations, are given an organization-specific subdomain to access the NRP LP. Access to the NRP LP via a Subdomain will disable the e-commerce module, thereby preventing users / admins from making purchases directly in the NRP LP.

Allow List

The following URLs are used by the NRP Curricula and should be added to the "Allow List" by the organization, based on the type of access.

Retail Portal HTTPS URLs (Port 443)

*.contentservice.net	Content Service
payflowlink.paypal.com	PayPal
*.nrplearningplatform.com	NRP Learning Platform
us.rhapsode.com	Rhapsode Area 9 Content

Organization Subdomain HTTPS URLs (Port 443)

*.contentservice.net	Content Service
*.nrplearningplatform.com	NRP Learning Platform
us.rhapsode.com	Rhapsode Area 9 Content
