

NRP Learning Platform

Instructor Registration Instructions

Instructors will need to register in the NRP Learning Platform to receive access to the 8th Edition instructor role and materials. All instructors will receive an email for access directly from the platform.

Once they receive this email, they will need to click on the complete profile button.

At this point, the user will be generated their NRP Global ID, which enables the user to use a single set of credentials to login to a user's consumer account and any of their linked organizational accounts. They need to remember their Global NRP ID as it will be used as their log-in credentials moving forward. Their full name and email address will also be displayed.

The instructor will need to select a password, ensuring all criteria is met, and can click on the eye icon to view the password they have created before confirming their password by entering it again.

Once they have created their password, they would scroll down and enter their job title and mailing address, confirming whether that address is their work or home address and click submit.

This instructor is now registered and can log into the NRP Learning Platform.
