

NRP Learning Platform

How to Launch an NRP Course from a 3rd Party LMS

These instructions share how to access the Learner Journey for launching an NRP course from a 3rd Party Learning Management System, or LMS. For this example, we are using the LMS called Scorm Cloud. Your LMS may have a different interface.

Log into Scorm Cloud, and enter the NRP 8th Edition Essentials Provider Curriculum.

Click on the LAUNCH button to launch the course.

Upon launching the course, you'll be asked if you already have an existing NRP Global Account.

An NRP Global Account allows users to create a personal account and link it with their organizational accounts, to allow the user to access and take their credentials with them.

If you click YES, you will be prompted to enter your NRP Global Account credentials and link your account.

To create an account, click on NO, then click on NEXT. You will be directed to create an NRP Global Account by entering my Personal Email address.

Then, you'll click on the VERIFY YOUR EMAIL ADDRESS button. An email will be sent to the email address with a verification code. Enter the verification code and click NEXT.

Complete the Account Profile Details. When finished, click on the SUBMIT button.

You have now created an NRP Global Account and can proceed with your learning by clicking on START ACTIVITY.

To return to your LMS, click on EXIT CURRICULUM, and then, if needed, close the connector window.
