

A CONTINUOUS QUALITY IMPROVEMENT PROGRAM TO
HELP EMS IMPROVE SURVIVAL FROM CARDIAC ARREST

On Scene, High-Quality CPR is the single highest determinant of survival from cardiac arrest.

How do you ensure that your agency is competent to deliver High-Quality CPR every day, in every cardiac arrest call?

Low-dose, high-frequency learning practices are **significantly more effective** at increasing and verifying competence.

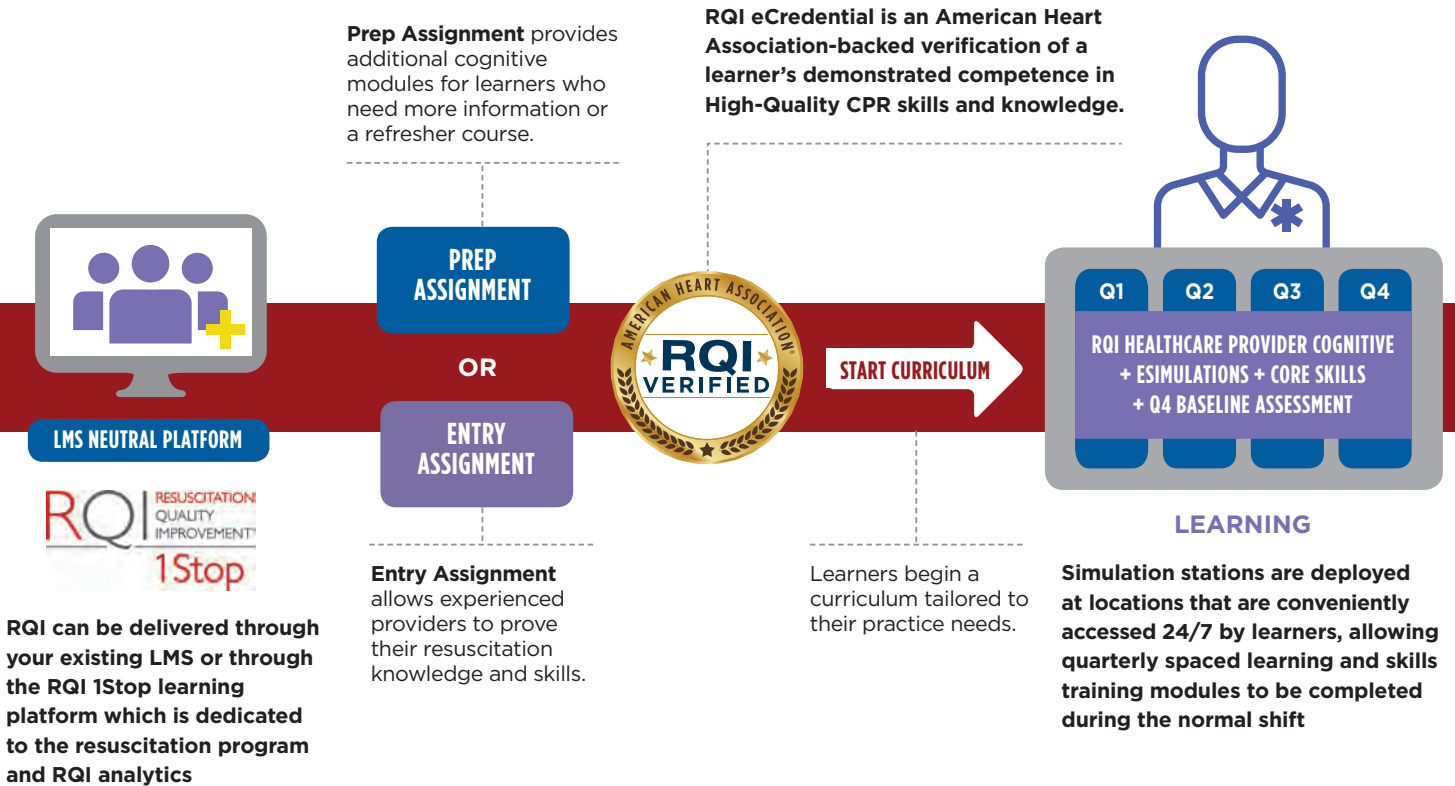

RQI shifts from a traditional 2-year compliance mindset to one of **mastery learning with verified skills competence**, establishing the new standard of care - *verified CPR competence*.

Resuscitation Quality Improvement EMS provides a high-reliability platform for simulation-based mastery learning, implemented through low-dose, high-frequency quality improvement sessions that measure and verify competence.

RQI EMS IS THE ONLY PROGRAM THAT DELIVERS THE NEW STANDARD OF CARE - VERIFIED CPR COMPETENCE - TO THE PREHOSPITAL PROVIDER

An American Heart Association® and Laerdal® Program

RESUSCITATION ACADEMY PROGRAMS RQI EMS is one of four programs offered through RQI based on Resuscitation Academy expertise. The others: RQI Telecommunicator; RQI EMS Team; and Cardiac Arrest System Assessment. The Resuscitation Academy is a foundation committed to improving cardiac arrest survival rates.

RQI Partners, LLC is a joint venture partnership between the American Heart Association and Laerdal Medical, positioning the organizations to deliver innovative solutions that accelerate the impact of their lifesaving mission. The company blends the Association's leadership in science with Laerdal's expertise in technology and implementation to deliver impactful and innovative resuscitation quality improvement programs.
